“PESW” Team

The Fusion of Metaverse, Squid Game, and PEPE: PEPE from Squid World

Our team consists of game industry veterans and blockchain developers with an average of over 20 years of experience. We have developed a variety of games, including metaverse platforms and MMORPGs, and have continuously participated in P2E projects. We've always aspired to create a project that combines community and gaming.

That aspiration has culminated in PEPE from Squid World. This project merges the metaverse with gaming, enabling community activation within the metaverse and play-to-earn opportunities in the game.

In Squid World, a multitude of actions are possible. Players can customize their own PEPE in various ways, enjoy games with friends, and earn rewards through gameplay. Additionally, you can become a VIP and watch other PEPEs play their games.

Squid “Metaverse” World

Squid world : Metaverse

Karen in New York and Darren in LA are crypto investors who love PEPE but have never met. However, they met in Squid World and quickly became close. They chatted, played games, and made money in Squid World, eventually falling in love. They've even decided to hold their wedding in Squid World. But they've never actually met in person. May God watch over them...

PEPE is Always Right!

The Squid World metaverse project began from a love for PEPE. People who enjoy various memes and crypto gather here, dreaming of enjoying not only PEPE but also various meme coins like Shiba, Doge, and more. We are striving to make it possible to enjoy all the memes of the world in Squid World.

Without being confined to specific memes or coins, we respect diverse cultures and ideas to create a space where everyone can have fun together. Breaking the fixed framework of the metaverse, we pursue new possibilities through free creativity.
